

This exhibit contains data related to all 254 Texas counties.

The "Estimated Change - Levy Increase" column shows the expected increase in a county's tax levy if the 1999 General Fund Tax Rate had been increased 8%, but limited to a maximum of \$0.80 per \$100.00 taxable property value.

Note that 7 counties were already at the maximum \$0.80 General Fund Tax Rate. Estimated Tax Levy increases shown for those counties are not zero due to math rounding when applying the formula for the new tax rate to the total 1999 Taxable Value for the counties.

The survey counties that were included in the report have been shaded across the exhibit for identification. The three counties added after publication of the Preliminary Report have a slightly darker shading. The high and low values for columns have also been shaded where these values are meaningful.

The CIP understands that Kenedy County is in the process of reducing its General Fund Tax Rate for tax year 1999 to the \$0.80 per \$100.00 maximum.

Effects of Raising the 1999 General Fund Tax Rate by 8% to a Maximum of \$0.80 per \$100

County	1999 County Tax Rate Information						1999 County Totals		Estimated Change		Population 1999 (est)
