WHAT IS AIRROSTI?

Airrosti is an outcome-based healthcare group committed to a patient-centered approach for musculoskeletal care. All providers are committed to a disciplined set of clinical pathways designed to reduce variability in care, improve recovery times, and prevent unnecessary imaging, surgeries, and injections.
WHAT IS MSK?

Neck Pain •  Mid Back Pain •  Triceps Tendonitis •  Low Back Pain •  Disc Injury •  SI Joint Sprain •  Hip Pain •  Hamstring Pull/Strain •  Sciatic-like Pain •  Calf Pull/Strain •  Achilles Tendonitis •  Sever's Disease •  Heel Pain/Spurs •  Headaches •  Rotator Cuff Pain •  Bicep Tendonitis •  Elbow Pain •  Hip Flexor Strain •  Groin Pull •  Carpal Tunnel •  Quad Pull •  Knee Pain •  Patellar Tendonitis •  Shin Splints •  Ankle Sprain •  Plantar Fasciitis

WHY OTHER CARE OPTIONS SOMETIMES FAIL:

- Limited Patient Time
- Unnecessary Pharmaceuticals, Injections, MRIs, etc.
- Lack of Adherence to Clinical Guidelines
- Transaction Based Care
- Limited Outcome Measurement
THE AIRROSTI DIFFERENCE

PROVIDER VETTING & TRAINING
- Rigorous provider vetting & intensive training
- Ongoing provider oversight & quality assurance

QUALITY PATIENT CENTERED CARE
- One hour of 1-on-1 patient time
- Thorough evaluation leading to accurate diagnosis

OUTCOME MEASURED ACCOUNTABILITY
- Outcome measurements with each visit & episodic claims analysis
- Patient education with focus on self-care & patient accountability

A thorough clinical assessment to evaluate your condition and determine the root cause of pain, while eliminating unnecessary imaging, injections, and surgeries.
Soft tissue/joint mobilization through a **hands on approach** to improve function and range of motion.
Customized stretches and exercises prescribed to help speed recovery time and prevent further injuries.
WHO WE HELP

- Acute & chronic MSK injuries & conditions
- Patients advised to undergo surgery or seeking an alternative
- Patients not getting lasting relief from epidural steroid injections & other pain management interventions
- Unresolved rehab patients
- Post-surgical patients that present with persistent symptoms/dysfunction
