DISCLAIMERS

120 single county departments in the State of Texas
44 Multi County Departments
= 164 departments = 164 ways of doing intake
I AM NOT AN ATTORNEY
OBJECTIVES:

- INTAKE
  - HOW IS A JUVENILE REFERRED
  - WHO CONDUCTS THE INVESTIGATION
  - WHO MAKES DECISIONS TO PROCEED
  - PURPOSE AND GOALS OF INTAKE
OBJECTIVES CONT.

• CONDITIONAL RELEASE AND/OR DETENTION
• ADJUDICATION/ DISPOSITION
  • RECOMMENDATIONS and WHY
  • $$$$$$
  • RESOURCES
OBJECTIVES CONT.

• SPECIAL ISSUES OF SMALL DEPARTMENTS
• UNINTENDED CONSEQUENCES OF JUVENILE REFORM
• MENTAL HEALTH
Intake

• How is a juvenile referred
Intake Cont

• Who conducts the investigation?
• Family Code 53.01
• Family Code 52.04(c)
Intake cont.

• Who makes decision to proceed
• FC 53.01
• Deferred prosecution
Intake cont.

• Purpose and goals
The fact that you're here means you will continue to make poor life decisions.
Conditional Release/Detention

- WHO MAKES THE DECISION
- WHAT DO WE CONSIDER WHEN MAKING THE DECISION
- SOME DECISIONS ARE OUT OF OUR HANDS
Adjudication/Disposition

1. Risk and Needs scores aka the “WHY”
2. Noble Reports
This report shows the frequency that different need areas are selected as the top need for all of the subjects in the system, and can be used as a starting point for evaluating the necessary treatment options available to your agency.

This report includes the most recent completed assessment for each subject, only indicates need areas, and does not consider Noble’s stabilizing factors.

This is a point in time report, and reflects the current top needs in your agency. As new assessments are performed on subjects, this data will change.
Frequency of Offenses Report

Report for felony, misdemeanor and other charges, and for male and female offenders between 1/1/2000 and 9/17/2019

Offense Frequency Report

This report shows the top five offenses by frequency for felony, misdemeanor and other charges, and for male and female offenders within your agency. Charges are ordered by the frequency they are assigned within the charges module.

This report shows all offenses with the selected criteria, with offense date between 1/1/2000 and 9/17/2019.

Note: This report is limited to the top 5 offenses, there may be more offenses, with the same count that are not shown.

More Information - Use the table below to get more specific information. Each column can be sorted by the value in those columns.
This report indicates subjects in the system where the most recent PACT/RPACT assessment has the 'Current mental health problems' response selected. This report is for all PACT/RPACT assessments completed between 1/1/2000, and 9/17/2019.

The charts to the right show the percentage of the population that has completed a PACT/RPACT with current mental health problems, and counts of the population grouped by the risk levels of those completed assessments.
Recidivism Overview Report

Noble broadly defines recidivism as a subsequent referral after the initiation of services on an existing referral. This basic definition serves as the basis for the recidivism report.

Further refinement is available, however, by allowing the definition to be narrowed by the inclusion of only particular types of re-offenses.

This report counts recidivism as felony, misdemeanor, and other re-offenses that occur any time subsequent to the first charge found within the interval range.

Note: This report considers all initial charges, with a qualifying disposition that is not pending.
Risk Level Report

This report shows a breakdown of risk levels based on the most recent completed assessment for each subject. Risk level is a key factor in the overall risk to re-offend, and helps make supervision level decisions moving forward with the subjects.

The charts to the right are a visual representation of risk level for completed assessments between 1/1/2000 and 9/17/2019, for the selected users.
ACE Scores Report

This report shows the correlation between ACE (Adverse Childhood Experiences) and PACT (Positive Achievement Change Tool) Risk Level.

The first chart shows the average ACE Score per Risk level for completed PACT assessments within the chosen date range.

The second chart shows a count of PACT assessments, and the associated ACE score.

For more detailed information including the date the assessment was completed, subject information, completed by, ACE score, and PACT score: Expand the "More Information" section on page 2.

More Information - Use the table below to get more specific information. Each column can be sorted by the value in those columns.
